

Provid – Acesys Alliance

[View the Alliance Presentation](#)

The Provid–Acesys Alliance was established to provide our clients with a high value, low cost option for expert exploratory drug discovery and to enable a seamless transition through all phases of discovery and development. Efforts are distributed across the alliance to leverage expertise and to ensure quality while reducing overall project costs up to 50%.

Drug design, exploratory medicinal chemistry, and project management is carried out by Provid's team in Monmouth Junction, NJ while supporting chemistry is provided at [Acesys Pharmatech](#) in Nanjing China. Downstream, Acesys' partner [ChemSpec-API](#) (Shanghai and Fairfield, NJ) conducts scale-up and GMP manufacturing of compounds for toxicology and clinical trials.
